PROFESSIONAL SUMMARY

Senior full-stack engineer with 5 years of experience building and operating production SaaS, ERP, commerce, payment, and AI systems. I work across TypeScript, Node.js, NestJS, React, Next.js, PostgreSQL, AWS, Docker, and CI/CD, owning delivery from architecture and data design through deployment, observability, and incident recovery. Earlier corporate legal practice strengthened my requirements analysis, risk judgement, and written communication.

CORE EXPERTISE

Full stack: TypeScript, JavaScript, Node.js, NestJS, Express, React, Next.js, Tailwind CSS, REST APIs, WebSockets

Data and systems: PostgreSQL, MongoDB, Redis, Prisma ORM, Supabase, BullMQ, schema design, queues, migrations

Cloud and delivery: AWS, Docker, Coolify, Render, Vercel, GitHub Actions, CI/CD, observability, incident recovery

AI and commerce: RAG, OpenAI and Anthropic APIs, structured extraction, Shopify, Stripe, Twilio, WhatsApp

Quality and security: Jest, integration and regression testing, RBAC, JWT, OAuth, accessible responsive UI

PROFESSIONAL EXPERIENCE

Build and Architecture Lead | CoRent Platform, Independent Contractor

United States, Remote | Aug 2026 - Present

- Lead payment, backend, and data-model work, delivering tested pull requests, architecture decisions, and review notes across assigned platform modules.
- Designed and hardened Stripe Connect onboarding, readiness checks, account recovery, and frontend integration contracts for a multi-party property-rental platform.
- Built Docker-based CI/CD for Render and AWS EC2 staging, with generated secrets, health diagnostics, environment isolation, and safer releases.
- Stabilized Redis failure handling and staging data, verified backup and restore procedures, and closed five release-blocking QA defects.

Technology: Node.js, Express, MongoDB, PostgreSQL, Prisma, Redis, Stripe Connect, Docker, GitHub Actions, AWS EC2, Render

Senior Software Engineer | BiggerRocks BV

Belgium, Remote | Feb 2024 - Oct 2026

- Architected and built Sprks, a production ERP for diamond inventory, accounting, atelier production, CRM, and document workflows.
- Built structured AI import for PDFs, images, and spreadsheets, plus a RAG copilot with more than 38 operational tools.
- Created a unified WhatsApp, email, and Trengo inbox with AI classification, routing, real-time workflows, and linked ticketing.
- Automated workflows that supported recovery of more than USD 2 million while owning testing, security, releases, observability, and incident recovery across a TypeScript codebase of more than 1,100 files.

Technology: TypeScript, Next.js, React, NestJS, Prisma, PostgreSQL, Redis, BullMQ, WebSockets, Docker, Coolify, Anthropic, OpenAI

ADDITIONAL EXPERIENCE

Full-Stack Developer | OnlyJewels BV

Belgium, Remote | Sep 2023 - Feb 2024

- Rebuilt a failed Next.js storefront in one week and reduced page-load time from about 120 seconds to under three seconds.
- Delivered technical SEO, Stripe payments, inventory integrations, a 360-degree product viewer, and responsive shopping journeys.
- Designed cost-conscious Vercel and AWS infrastructure and supported the release through production stabilization.

Technology: Next.js, React, Node.js, NestJS, MongoDB, Stripe, AWS Lightsail, S3, Vercel, ImageKit, Sharp, FFmpeg

Frontend Developer | Stripe-Tec

Remote | Jan 2022 - Sep 2023

- Delivered three revenue-generating client websites from signed proposal through launch, including Gasport, Uandu Designs, and an NDA healthcare project.
- Built responsive interfaces with reusable components, cross-browser support, technical SEO, analytics, and production handover documentation.

Technology: JavaScript, React, Next.js, HTML, CSS, technical SEO, analytics

Shopify Developer, Contract | Zam and Zom LLC

United States, Remote | Jun 2023 - Dec 2023

- Delivered and supported a custom Shopify storefront for a US childrenswear brand, covering theme development, payments, inventory, technical SEO, and mobile optimisation.

Technology: Shopify, Liquid, JavaScript, HTML, CSS, payments, inventory, technical SEO

SELECTED ENGINEERING WORK

Founder and Lead Engineer | Getech Legal Operations and Marketing Platform

Nigeria | 2026

- Built a production platform for legal operations and professional services, including publications, lead capture, privacy-aware analytics, and assisted workflows.
- Established Docker and Coolify delivery, smoke and contact-handler tests, technical SEO, social-card generation, and a practical launch runbook.

Technology: Next.js, TypeScript, Node.js, Docker, Coolify, MDX, analytics, technical SEO, automated testing

LICENCES AND PROFESSIONAL CREDENTIALS

Find Case Law computational use: Secured 2026 approval from The National Archives for a transactional licence supporting computational use of UK judgments, including England and Wales.

EDUCATION AND PROFESSIONAL BACKGROUND

Barrister-at-Law: Second Class Upper, Nigerian Law School, Abuja, 2017

LL.B Honours: Second Class Upper, University of Nigeria, Enugu Campus, 2016

Practised corporate and commercial law from 2017 to 2022. That work developed the requirements analysis, risk assessment, documentation, and stakeholder communication I now bring to engineering.
